

More Falcons.

The Glendale Falcon Football Booster Club is leading the blitz to make this HPER (Health, Physical Education, Recreation) facility at Lowe Stadium a reality on the Glendale High School campus.

The facility, the first of its kind in Springfield, is being funded by private donations. It will provide football locker rooms and coaches offices, all connected to an indoor training facility. The HPER will serve both men and women athletes and provide a venue for other school activities.

Research has shown that athletic participation increases student achievement, leadership, grade point average and attendance. These students have made an investment in their future - have you?
